Gender Gap in Digital Learning

Breaking stereotypes: Girls in tech

Analysis

Historically tech education has been male-dominated, but our data shows 48% of coders are female. In AI tools, female adoption is 67% (vs 61% male). Creative skills show female dominance: 62% of graphic designers, 58% of video editors are female. The gap is closing rapidly.

Key Statistics

78% of students use YouTube for self-directed learning. Average screen time: 4.7 hours/day, of which 67% is educational. 64% of students use AI tools, with 89% reporting improved learning. 71% have turned a screen hobby into a measurable skill. Top learning platforms: YouTube, Khan Academy, Discord, Coursera.

Methodology

Data collected via 8-step anonymous survey, n=150+ students, ages 14-19, across 12 Indian cities. AI analysis using Google Gemini 2.0 Flash. Statistical analysis with Python pandas/scipy. Confidence interval: 95%.

Implications

These findings have significant implications for educators, parents, and policymakers. Historically tech education has been male-dominated, but our data shows 48% of coders are female. We recommend further research and pilot programs.
