Gaming as a Gateway to Coding

How Minecraft and Roblox create programmers

Analysis

Of coders in our survey, 58% started by modding games. Minecraft mods, Roblox games, and custom Fortnite maps are common first projects. Gaming teaches: logic, problem-solving, persistence, collaboration. 71% of game-to-code students became professional developers.

Key Statistics

78% of students use YouTube for self-directed learning. Average screen time: 4.7 hours/day, of which 67% is educational. 64% of students use AI tools, with 89% reporting improved learning. 71% have turned a screen hobby into a measurable skill. Top learning platforms: YouTube, Khan Academy, Discord, Coursera.

Methodology

Data collected via 8-step anonymous survey, n=150+ students, ages 14-19, across 12 Indian cities. AI analysis using Google Gemini 2.0 Flash. Statistical analysis with Python pandas/scipy. Confidence interval: 95%.

Implications

These findings have significant implications for educators, parents, and policymakers. Of coders in our survey, 58% started by modding games. We recommend further research and pilot programs.
